When is a good time for talking together?

Any other 'together times'?

## Top tips for talking

I like it when you **get down to my level** so I can see your face.

I like it when you **pause and wait** for me to show you what I'm interested in.

**Listen, watch and respond** to me to help keep me interested.

I like it when you **say what I am thinking, doing or feeling**, rather than asking me questions.

It's fun when you **copy me**. Try adding a word – it helps me learn new words too!

I like it when you **use a fun voice and show me** what you are talking about.

I feel more relaxed when you **speak to me in the language** you feel most comfortable.

I love it when you **chat, play, share books and sing** throughout the day with me.
