How to contact us

What is a business plan?

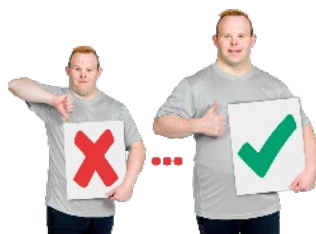

A business plan explains business ideas, goals, and how you plan to make them happen.

Improved outcomes for all

Sirona wants to provide excellent healthcare in the community for adults and children in Bristol, North Somerset, and South Gloucestershire

This plan explains what we want to focus on to make our services even better.

v

Sirona's main goal is:

"Improved Outcomes for All,"

This means we want better health for everyone.

We will work with other people and groups to reduce any unfair differences in health.

Our mission is:

"One You, One Sirona, One System,"

"One You" means focusing on individuals.

“One Sirona” means working together.

“One System” means working with others across the health system.

More people have complex health needs, so our teams are facing increasing challenges.

We want our healthcare in the community to provide the right care at the right time.

Our main goals are

Stop health problems and provide care early.

More care in people's communities instead of hospitals.

To provide joined-up care with other organisations for people with complex needs.

To deal with any unfair differences in people's health.

This means understanding and removing barriers to accessing care.

How we will achieve these goals

By understanding people's needs, we can reduce inequalities.

We will make our services safe, welcoming, and easy to use.

We will work together with others to come up with new ideas.

We will make Sirona a great place for our staff to work.

We will keep our promises and always try to improve.

Important words

Partnering

Working together with other organisations to share responsibility.

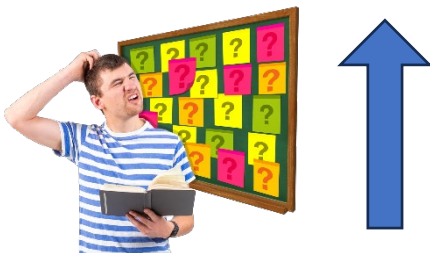

Health System

A health system is the way health services are provided to people.

Complex

Lots of different and connected parts.

Increasing Challenges

A situation that gets harder and harder over time.

Things that stop people from getting the right healthcare and support they need.

Barriers to accessing care

It is when people are not treated fairly or equally.

Inequalities
